

Texas Tree Trails

16 Steel Rd.
Wylie, TX 75098

Thank You

The Texas Tree Trails program is a cooperative effort to find and recognize significant trees in Texas. The program is sponsored by the Texas Forest Service (TFS), Trinity Blacklands Urban Forestry Council (TBUFC), the Cross Timbers Urban Forestry Council (CTUFC) and the Dallas Historic Tree Coalition (DHTC). Our efforts at this time are focused on the expanded Dallas-Fort Worth Region. See our web site at <http://www.texastreetrails.org> for additional information and a map of the region.

You will receive copies of your site form and measurement information for your tree(s) we collect after we compile the data into our database. If your tree(s) meets the requirements for Champion or a Historic/Heritage tree status, you will receive a certificate suitable for framing and bragging rights.

Thank you for participating in the Texas Tree Trails Program!!! Please feel free to contact our representatives at any time. You have added greatly to the knowledge of our area trees, helped preserve our single most precious botanical resource and have helped the public understand and appreciate these treasures!

Tree ID # [additional tree IDs if applicable]
